

# Reversible MPO Jumpers

## Reversible MPO Jumpers for 10 to 100G datacenter applications

Xtreme12™ Reversible MPO jumpers are used to cross connect MPO trunks to active electronics, other MPO trunks, or extend MPO backbones. They feature 12 fiber, 3.0mm round plenum rated cable with internal aramid yarn strength members. Polarity can be changed in the field in seconds without any tools.

Bend Insensitive fibers are standard in all Xtreme12™ MPO OM3/OM4 jumpers.

### Method A

### Method B

## Easy Polarity Change - No Tools Required!
